

Project

Password hashing application

Issue Type

Bug

Summary

Word “received” is misspelled when shutting down the application

Priority

Trivial

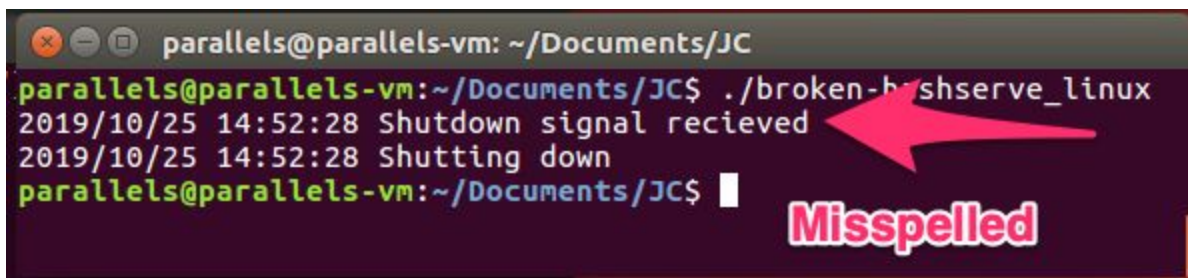

Description

Steps to reproduce:

1. Open Terminal and run the following command to start the application:
`./broken-hashserve_linux`
2. Open a second instance of Terminal and run the following command to stop the application:
`curl -X POST -d shutdown http://127.0.0.1:8088/hash`

See attached screenshot.

Attachments

The screenshot shows a terminal window with the following text:

```
parallels@parallels-vm: ~/Documents/JC
parallels@parallels-vm:~/Documents/JC$ ./broken-hashserve_linux
2019/10/25 14:52:28 Shutdown signal recieved
2019/10/25 14:52:28 Shutting down
parallels@parallels-vm:~/Documents/JC$
```

A red arrow points to the word "recieved" in the first line of output. Below the terminal output, the word "Misspelled" is written in a stylized, pink, outlined font.
